

# CaptureZ

Digitize in a flash

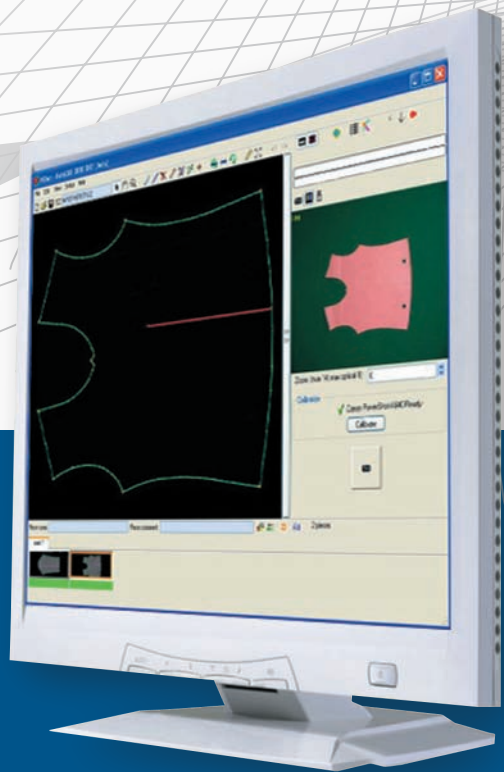

## Introducing digitizing in one camera shot

Discover the CaptureZ solution

- **With one camera click automatically digitize multiple pattern pieces.**
- **Perfect for thick pattern materials, paper and cardboard.**
- **Guaranteed accuracy.**
- **Affordable digitizing.**

Accurate.  
**Versatile.**  
Easy.

Optimize your way of digitizing. Let us prove it.

# CaptureZ

Three easy steps. Done.

## 01. Capture

The Capturez consists of a camera suspended from the ceiling, mounted to a table, or attached to a free standing boom. A simple calibration step ensures that the picture is always precise.

Place multiple pattern pieces on table. With one mouse click the camera shoots a picture and the Capturez automatically digitizes!

For maximum efficiency, new pieces can be immediately placed on table, while another user operates Capturez software.

## 02. Edit

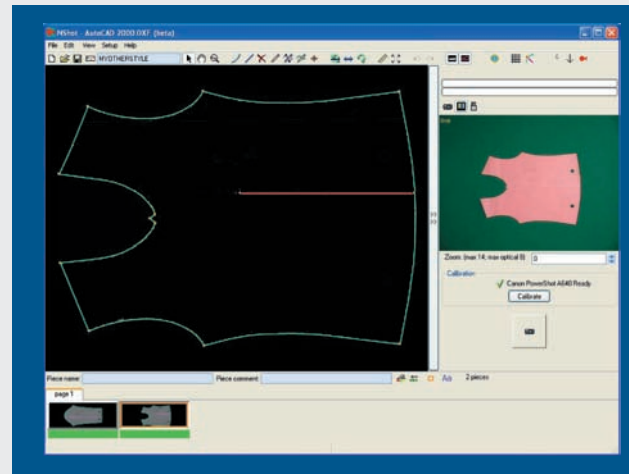

The digitized pattern automatically appears on the screen. A live window on the sidebar shows the real-time camera view of the table.

Simple tools are provided for editing including: combining pieces, smoothing lines, mirroring pieces, adding notches, drill holes, seamlines and more.

Other options include grading tools, internal lines detection and marker mode.

Image retains all information. Never lose any markings.

Interface is user friendly. Takes minutes to learn!

## 03. Export

Save and export file to multiple formats:

Accumark,  
Micromark,  
Polygon,  
ASTM,

Audaces,  
Lectra (IBA),  
Lectra (MDL),  
Investronica,

Tukatech,  
IMA Genius  
Optitex,  
Assyst,

FK,  
Moda01,  
AutoCad,  
and yours...

**Integrate with your network. Multiple users per a single camera. Communicate pattern information to your team with the piece images and vectors. Potential for expedient interactions between factories in different locations. Capturez is your complete digitizing solution.**
