

AKI-2

Automatic tool initialization for Zünd modular tool inserts

AKI-2 (**A**utomatic **K**nife **I**nitialisation) combined with the Zünd TOOL MANAGER make operating Zünd cutters easier than ever. The tool setup process now requires only three simple steps:

- 1 Insert tool
- 2 Position AKI-2
- 3 Start initialization

AKI-2 can be used for any tool (1–9), and makes tool setup automatic, fast and reliable, at the same time eliminating potential for errors inherent in manual tool setup.

1. tangential knife
2. kiss-cutting knife
3. pen insert
4. electric oscillating tool
5. pneumatic oscillating tool
6. driven rotary knife
7. 150W milling spindle
8. 450W milling spindle
9. 1kW milling spindle

ZST-11-2008-mze

Benefits

- Extremely user-friendly operation
- Automatic tool assignment
- Enhanced productivity

Minimized potential for errors

Speedy tool change over

Exact and reliable blade-depth positioning

Longer-lasting consumables (reduced wear)
