

# Collection tray

The collection tray is a handy option for neatly collecting waste materials and keeping cut parts from falling on the floor.

Depending on production requirements, the tray can accommodate different scenarios; it can be used for collecting either cut parts or waste material - after they have been separated on the conveyor belt, or for catching all of the materials (cut parts and waste) for subsequent separation.

The tray is collapsible and can be adjusted for catching different types of materials as they drop off the conveyor belt. It can easily be removed from the cutter and carried away for emptying. When not in use, the tray folds back completely to minimize space requirements.

Operator emptying tray.

Adjustable opening accommodates a wide variety of materials.

Tray folded back (when not in use) to minimize space requirements.

ZST-05-2010-lbe/tma

## Specifications

Available for G3, with or without cutter extension.

## Benefits

Handy, versatile catch-all.

Tray is easily removed and emptied.

Minimal space requirements.
