

# Signal light

The signal light serves as machine status indicator. Different-color lights signal various operational states of the cutter. The status of the cutter is easily visible even from a distance.

In the standard configuration, the signal light is available with the colors red, yellow, green, and blue indicating various operational states of the machine, including errors and warnings. The signal lights are mounted at a height of 2.3m/7.5ft, above the workstation.

In a standard configuration the following operational states are displayed:

**Red** STOPPED (Cutter stopped)  
Error (Cutter stopped)

**Yellow** OFFLINE (Cutter stopped)  
Warning (operation may continue; error message appears on control panel)

**Green** ONLINE (Cutter in operation)

**Blue** User intervention required.  
(on control panel/in Zünd Cut Center, ZCC)

ZST-10-2010-pha/tna

## Specifications

Standard colors: red, yellow, green, and blue.

Mounted at workstation at 2.3m/7.5ft height.

No color displayed when cutter turned off.

Retrofit possible for existing G3 machines.

Requires firmware Version 1.46 or higher.

## Benefits

Visual display of various operational states of cutter, including errors and warnings.

Easily visible from a distance.
