

Videojet 1510 Inkjet Printer

With the Videojet® 1510 adapter kit for G3, Zünd is able to offer a convenient, versatile solution for marking and coding a wide variety of materials.

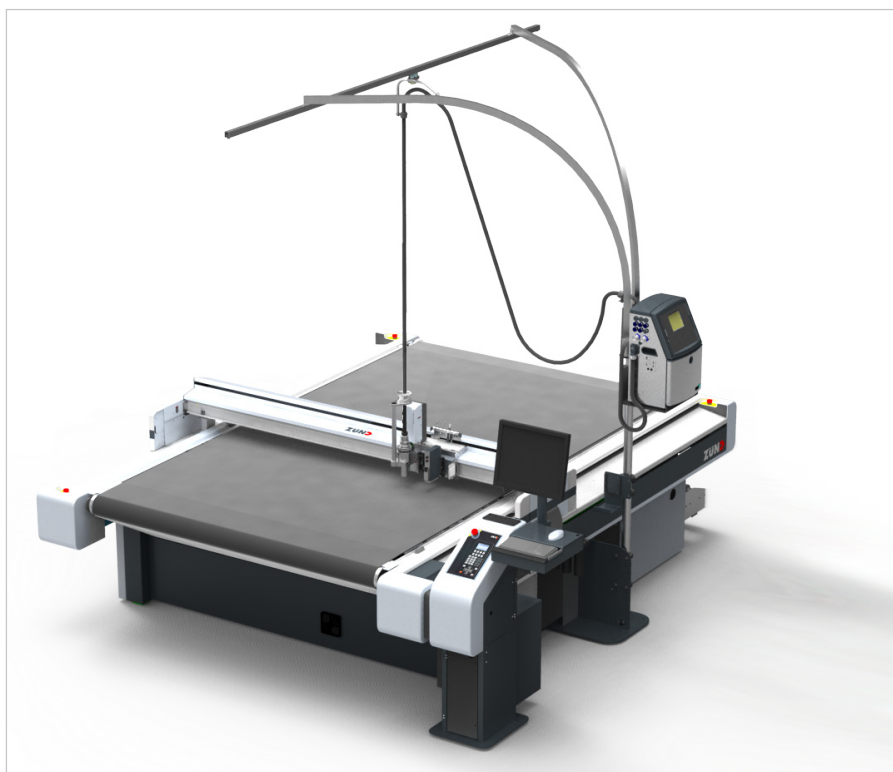

This small-character continuous inkjet printer from Videojet® can be integrated perfectly with a G3 adapter kit and controlled with GTK software. Adapting this print option for G3 cutters makes it possible to combine cutting and marking in the same production phase. The ink jet printer is suitable for marking materials with printed characters and barcodes.

Applications for this marking tool are varied and numerous, including product tracking & tracing, optimization of logistics, and quality control.

Designed for multi-shift operation, the Videojet® 1510 requires remarkably little maintenance.

The system uses high-quality inks that offer good adhesion and dry quickly without releasing toxic fumes.

For more information on the Videojet® 1510 Ink-Jet Printer, please visit www.videojet.eu or www.videojet.com.
